

2023 Zoanthid Growout Contest Submission Form

The intention of this contest is to have fun, learn from each other, become better reef keepers, and earn some good old fashioned bragging rights, while engaging with other club members. The fee that is collected will be distributed to the winner of the contest.

This form is provided to collect data about your tank parameters while tracking your progress as the zoanthids multiply. Hopefully you will notice differences in your coral as they grow and observe how they react to changes in water chemistry, lighting, and water flow.

We hope that you will share your experiences with the club during and after the contest.

Alkalinity	Magnesium	Calcium	Nitrates	Phosphates	Temperature	Salinity	Number of polyps
